

The quality of
expertise,
the creativity of
innovation

The **SIT S.r.l.**, single member company, was born in 2013 from the vision of Walter Gizzi, Chief of the C.d.A. who since the 90's, has been actively and successfully working in the managing of building companies; also thanks to the collaboration of both public-sector entities and important private companies.

The very dynamic and determined nature of its founder has led this small enterprise to gain professional and technical high level collaborations, nowadays.

HOW WE WORK

In order to answer to the constantly new challenges of the market, to satisfy a high professional way, a very competitive environment: the company contracts high qualified technicians and skilled workers, along with having innovative technologies and products.

We may collaborate with external companies, carefully selected, when high specialized work is requested, always keeping control of the productive process and to remain responsible for always giving excellent quality to the client.

Our main working features:

The Quality

of our offer and completed projects, gained thanks to the systematic application of the **Management System for the Quality UNI EN ISO 9001:2015** sector EA 28, and thanks to our **suppliers** as well as the **qualified material** and the compliance to the **D.Lgs.231/01**

The safety and the health

of our workers, represent one of the main objectives that we focus on. We are constantly committed to pursuing and improving goals through modern and **innovative training and tools**.

The professional expertise

in which together we have a deep knowledge and proper **experience with the existing regulations**, and also thanks to the collaboration of our lawyers, grants us excellent results.

The post installation assistance

is one of the services in which the company believes the most in, giving the customers the chance to be part of the **Scheduled Preventive Maintenance Plan** on the plants as well as having availability to its technicians.
